

Goedhart® VNS air coolers

DIMENSIONS & WEIGHTS

The Goedhart® VNS range of ceiling mounted aircoolers are specially designed for use in chill rooms, working with an air temperature of $\pm 0^{\circ}\text{C}$. The aircoolers are especially suitable for vegetable and fruit storage, working with a small ΔT to prevent dehydration of the product. The height of the aircooler is low, so the maximum space in the chill room can be utilised.

Casing

- Construction for ceiling mounting
- Casing material of galvanized sheet steel
- Standard white epoxy spray finishing
- Bend/header projection by end covers, easy removed for maintenance
- Standard refrigerant connections are positioned on the left hand side of the unit when looking with the direction of the airflow
- Possible defrost by hot gas spiral or electric defrost elements will be fixed to the bottom side of the coil
- Hinged drip tray prepared
- Stainless steel fasteners

Goedhart® VNS features

- Especially for agricultural applications
- Copper tubes and aluminium fins
- Consisting of 16 models
- Capacity range from 6,4 to 62,5 kW (R404A dx, SC2)
- EC fan technology possible
- Suitable for most refrigerants / coolants with exception of NH_3
- Up to 8 fans, fan diameter 350, 400, 450 and 500 mm
- Goedhart® VNS is delivered on a wooden frame for easy mounting

The dimensions in the tables are external dimensions of the heat exchanger. Measures such as suspension points, but also internal volume [dm³], other conditions, refrigerants, coolants and materials are available in the Goedhart GPC selection program. Goedhart GPC is free to download from www.kelvion.com.
